## SCHOOL SONG

Rah, Rah, Rah, Lakeview High School,  
 You're the rarest, fairest in the land.  
 Here's to students true, and teachers too,  
 Need we say we think you're simply grand.  
 Rah, Rah, Rah, Lakeview High School  
 Raise your colours blue and white,  
 And where'ere we go, let the people know  
 That we're out to do the thing that's right.  
 We know we belong to the best,  
 Let the others belong to the rest,  
 And when we say "YEOW!"  
 A yip-i-o-ee-ay,  
 We're only saying,  
 We're doing fine Lakeview High School,  
 Lakeview High School's O.K.

## Dedication

As of next year, Mr. Clendenning will no longer hold the position of Vice-Principal at Lakeview High. He will, in fact, be the first Principal of Port Arthur's newest vocational high school, Hammarskjold High.

Mr. Clendenning has been at Lakeview since the school opened five years ago, and during that time he has been head of the Mathematics Department. For the past three years, he has been our Vice-Principal.

We know that we speak for the entire school body when we say that Mr. Clendenning has been, and will continue to be, a friend of every student at Lakeview. To him go all our congratulations and best wishes for his future success at Hammarskjold High.

## Principal's Message . . .

As I pen these lines I am on the Canadian heading for Sudbury and the Northern Ontario School Boy Curling Championship Bonspiel with a group of students who symbolize those characteristics that Lakeview's leaders set out five years ago to develop—enthusiasm, modesty, skill, determination, sportsmanship, and that happy balance between scholastic and extra curricular zeal.

These same qualities are depicted in the students with whom I have had the pleasure of conferring in the preparation of this Year Book. These young people, I am certain, are not only getting a great “kick” out of living now, but what is vastly more significant, they are establishing a pattern of living that augurs well for a happy adulthood—that eminent type of happiness that comes from participating constructively in worthwhile enterprises through the development and use of their God-given talents.

It is my sincere hope that these same attitudes become inculcated in every student whose privilege it is to attend Lakeview High School.

—W. B. SIME,  
*Principal.*

# VALEDICTORY ADDRESS

DOROTHY MAKI

*Mr. Chairman, Honoured Guests, Beloved Teachers, Fellow Graduates,  
Ladies and Gentlemen:*

Exams are over, our diplomas are a proud possession, and suddenly our years at Lakeview are only a memory. All at once we are no longer students of history . . . but makers of history, each in our own small way. We are now an active part of a working world competing for success and security against many who have years of experience with their work and with people. It is now, in retrospect, that we see how our years in the student world have fitted us for the stiff competition and the complex problems that will constantly confront us. Too, it is with mixed sentiments of nostalgia and regret that we say our final farewell to Lakeview.

The past years have been full of warmth and excitement—from our first infamous initiation to our last riotous election campaign. Soon, we will forget the cruel grind of examinations for more exhilarating memories such as those thrilling victorious moments on the football field or on the track—truly proud moments for our school. Many times in the years to come we will take time out to laugh again at Roy and Larry in their ballet costumes in assembly or at Barry in his bikini. Our hearts will swell with satisfaction when we think of Lakeview's many successful undertakings—the parades, the dances, the annual Lakeview Review, to name a few. Working hard was a pleasure when we were together.

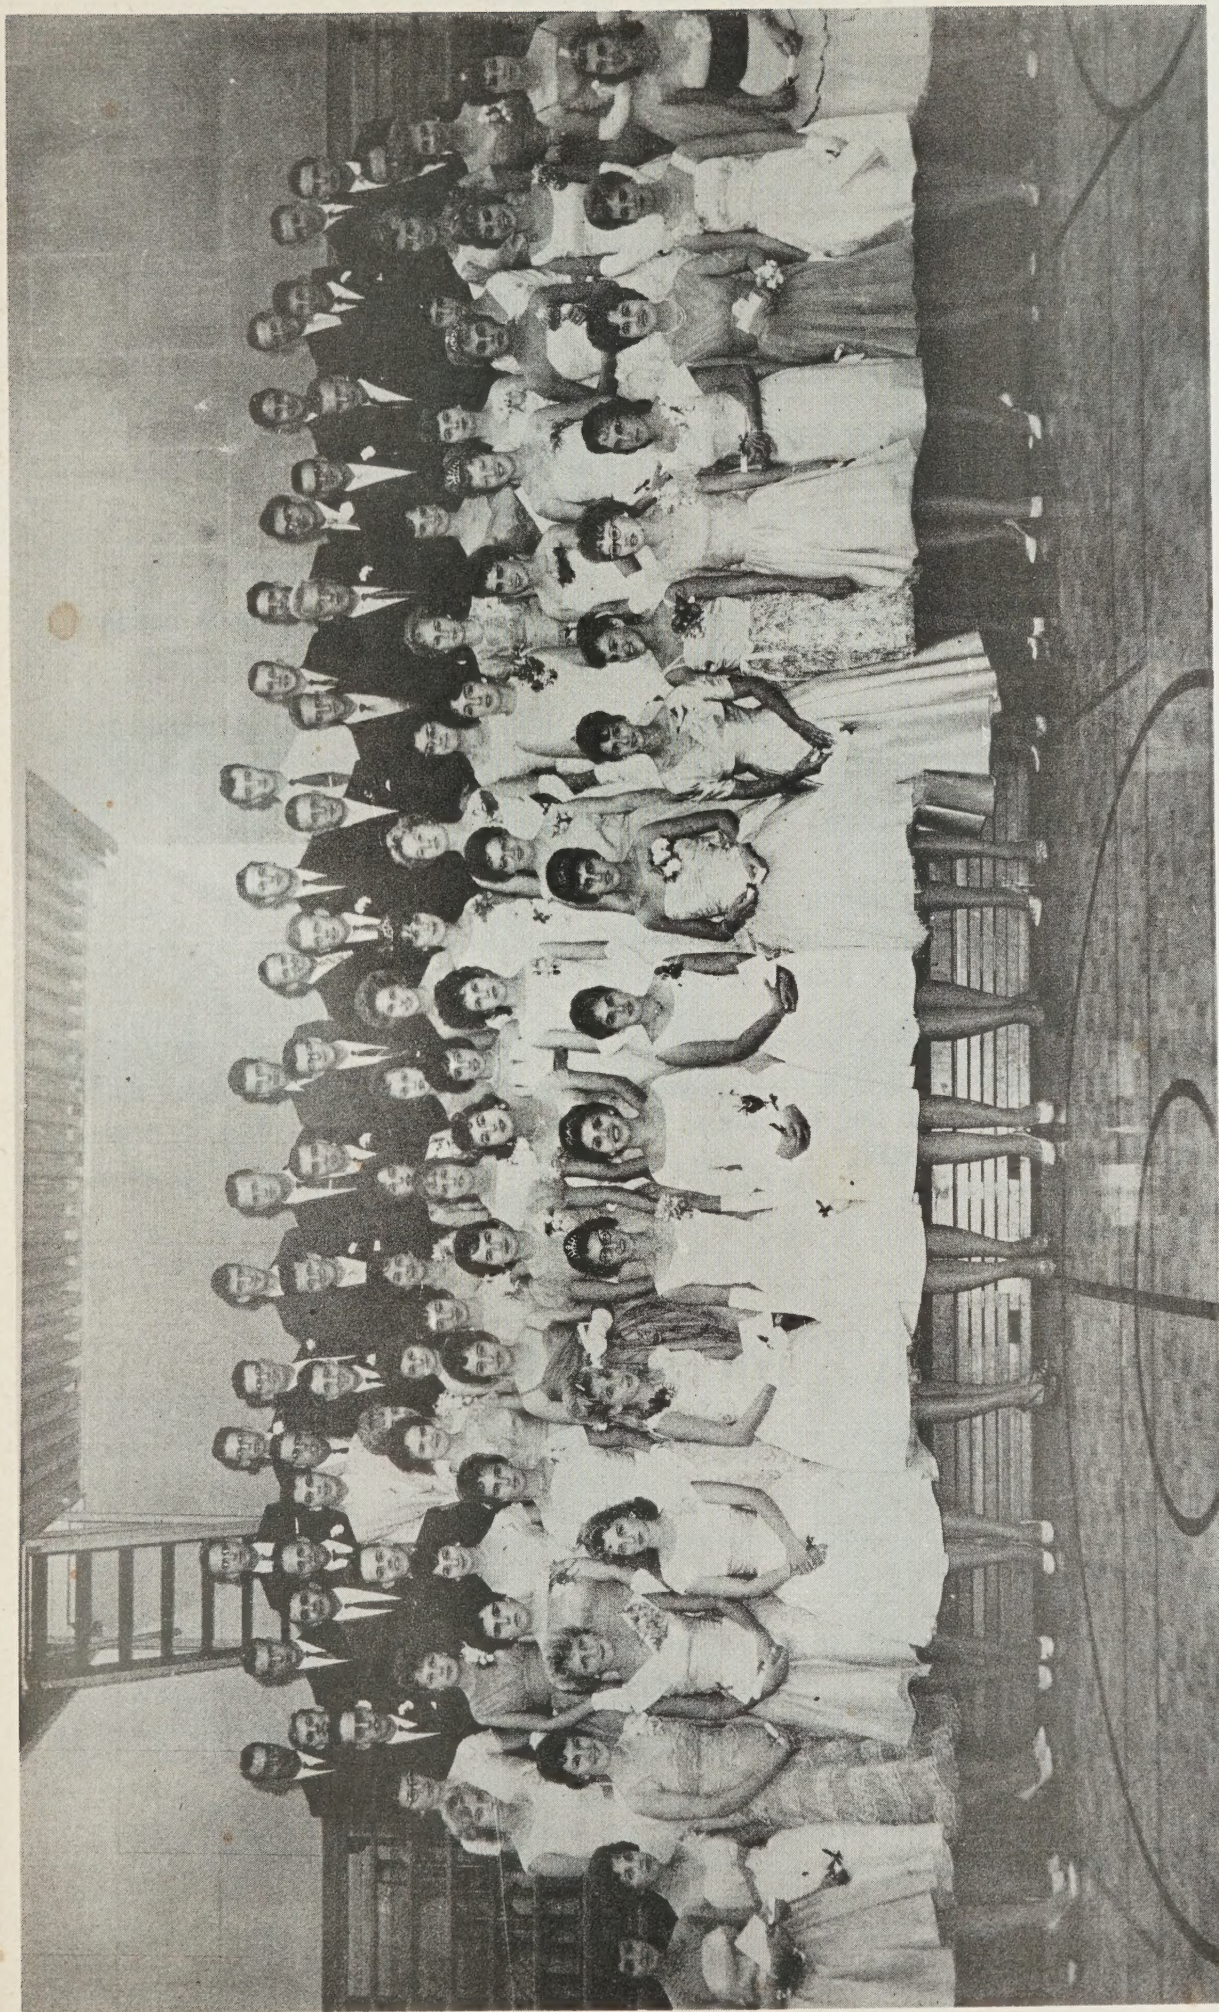

But the pranks and careless freedom of our Lakeview days are gone now, and in their place stretches a long, tortuous road made rough with many obstacles. We ask ourselves, "Am I prepared? Am I intelligent enough, sophisticated enough; am I brave enough?" Here at last, while travelling this road, we will discover just how solid is the foundation of knowledge which we have built during our school years.

We have gone through a highly selective process and have emerged with something we shall cherish always. We have matured (at least we like to think so) and we have learned much, as shocking as it may seem to some of our parents. Through our participation in student activities, we have gained experience in leadership and in exercising our initiative. For this great opportunity we sincerely thank you, our teachers and benefactors. Whether or not we took advantage of this opportunity to share your knowledge and your friendship was our own decision. But I think that all of us, although we rarely showed it, I am ashamed to say, we did try our utmost to make you proud of us.

So, as we leave these august halls and corridors we will follow the footsteps of other successful graduates of previous years. Like them, we also are unsure of our future; for most of us it entails further education. But this I know. Wherever in this wide world there goes a Lakeviewian, there goes a little bit of Lakeview with him and he may not forget that fact nor ignore it. It lies within his power to some extent to bring credit or discredit to his school, honour or dishonour. And I feel certain that to a school that has given each of us here so much, we can only give the very best in return.

Thank you.

## PRESIDENT'S MESSAGE

JACK EDWARDS

Many students wonder "What is the Students' Council? What does it do?" Anyone is readily aware of its immediate activities, such as dances, but what else does it do?

This school organization is the students' governing body. In times of necessity, it lends money to various organizations or groups such as the Red Cross, which is just starting, or the Boys' Curling Team, which travelled to the Northern Ontario finals. However, the most important task of the S.A.C. is as a mediator between staff and students.

During the past year, it has been my honour and privilege to serve you, the students of Lakeview High School. This honour is enhanced upon looking back on the Junior Football Championship, Track and Field laurels, outstanding musical talent and most of all, scholastic achievements.

I should like to say "Thank you" to our teacher-advisors Mr. Rapley and Mr. Manns, for their helpful guidance and constructive criticism; to the council members for their willingness to "Pitch in" and help in even the most difficult tasks; to the students at large for their school spirit—this is what makes Lakeview the best school at the Lakehead.

## — EDITORS' MESSAGE —

—ALICE CHAYKOWSKI AND ADAM MORTON.

The production of a Yearbook is an enterprise requiring much seemingly unrewarded work. However, all who have worked on one will testify that the satisfaction obtained from seeing the result of one's labour well repays the effort involved.

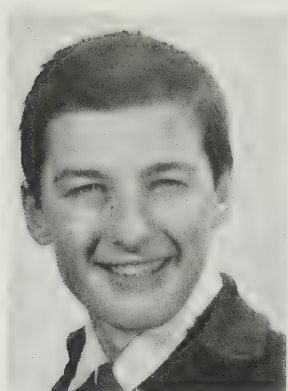

No mere book can recreate a year and all its activities; however, we hope that this Yearbook has captured some of the "Lakeview Spirit" that is behind all the school's activities. It would require an encyclopaedia to chronicle all the things that Lakeview and her students do, but we can present some of them, and hope that the essence of all is preserved.

The job was made easier by the aid of Mrs. Westbrook, our teacher-advisor, Mr. Listmayer, who helped with the photography, Patti Probizanski, and all the editors whose support, both physical and moral, was incalculable.

# GRADUATES

ELVELYN BROWN—"Ev" is our attractive newcomer from British Columbia as she is a real sports enthusiast she is taking full advantage of our wonderful weather and can be found skiing or curling on Sundays. Her ambition is to become a Public Health Nurse. She plans to go back home after Grade 13 to fulfill this ambition.

GLORIA HARRISON—Gloria is a mixture of fun, hard work, and friendship, but not, unfortunately for her car, of mechanical aptitude. She will make it this year if she works hard, as she always does, and smiles at Messrs. Rapley and Macdonald. She is bound for success in whatever she was meant to be, which by self admission is a mother.

ANNE DE ROOY—Although Anne spends most of her time listening to a certain singing idol's records, she can usually be found during the five minute break madly cramming for a Trig test she didn't know anything about. She plans on becoming a Teacher but will probably spend the next few years waiting for airplanes that never arrive on time.

HELEN JAKLITCH—Helen's warm personality and smile made her well liked by everyone. She is full of pep and is always singing. Helen has been an avid participater in volleyball and track and field, but this year she has sacrificed sports for her studies. She spends most of each weekend soothing fevered brows at St. Joseph's Hospital as she prepares for her future career.

DIANE DUKE—This kid is self made—with an exception or two. Her spare time is divided between Peter, Mitchell's and school in respective order. Her present ambitions include a year at Teachers' College. She can be seen setting up strikes at the Big M. Her favourite saying is "I dunno!"

SHIRLEY MANTILA—Shirley is a friendly Miss whose bright personality has won her many friends. She is also a good student. Next year will probably find her at Waterloo where she hopes to earn a degree in Honour Math. If you asked her, Shirley would probably tell you that there is little time left for homework after skin diving life saving classes and the like.

IRENE HARASYMEW—Rene, an avid jass fan, participates in several school activities. She plays the clarinet in the School Band and Orchestra; Vice-Pres. of the Drama Club, Rep. to the S.A.C and Fashion Editor of the Teen Page. Wonder when Rene will get that "love seat" a certain history teacher has threatened to get her.

LUCILE PINGREE—"Shanks", an energy bound cutie is often seen in the halls with a certain fellow who has been taken by her quiet (?) charms. An outdoor fan, Lucy enjoys skiing and swimming. Her pet peeves include a certain math teach. Lucy plans to take a General Arts course at Smith College for Girls, a stones throw away from a Boys' College. Wonder what "Dobie" thinks of that.

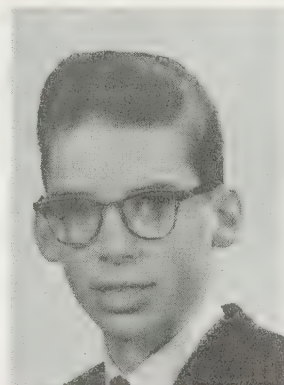

**MARIANNE RINNE** — Marianne, with her quiet personality is well liked by all the classmates. In the Fall she plans to attend Waterloo, to take up star gazing (astronomy). Her pet peeve is a certain "writer" in chemistry class. On Saturday, one can find her puttering around the stove, making up some new concoction. As the saying goes "The way to a man's heart is through his stomach".

**TERTTU VERORINEN**—Terttu has been the backbone of girls' volleyball and basketball ever since she started high school and has won fame for Lakeview with her athletic accomplishments in track and field meets right across Canada. She gets A' in Math but often heard to complain about English essays. Despite this, Terttu is headed for great things, least of all, the Olympics.

**NORMA ROBERSTON**—Along with being a top scholar in her class Norma, (Miss Legs, 1960) also manages a pretty active social life (Bert) two hours out of every day she can be heard saying "What're you talking about, you guys?" Being a senior cheerleader, Norma can be heard cheering her loudest when Bert gets a touchdown. Norma plans on being a Psychologist or Ph. Ed. Teacher.

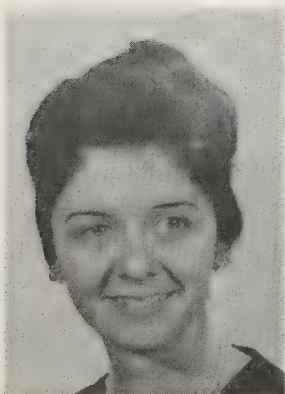

**BOB ARVELIN**—Bob spends his winter weekends trying to bowl and ski. On the slopes he's known as "Crush" and on the alleys as "Ten-Pin". He plans to take Engineering at Waterloo next year. He's 13A's lifeguard in Physics classes. Bob loves golf and plans to make a tour of world-famous courses. His ambition this year is to beat "Mess" in a few tournaments.

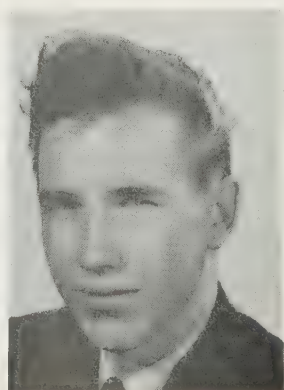

**AILA SALO**—Aila, although she appears to be the quiet type at school, we all know that her tired look on Monday mornings is because that certain fellow from Selkirk has been keeping her busy all weekend. Aila's hobbies range from stamp collecting to sewing. Although her main ambition is to go to Western to become a bookkeeping teacher we know that she would like to have that ring put on her third finger.

**KEN BATTLE** — When Ken graduates his humorous pranks will be missed by his fellow students if not by the teachers. He plans on studying Dentistry when he finds time away from his poker party activities, but he will probably wind up being a "con-man" or a "bookie". Ken's activities include skiing and curling and his ambition is to be the world's richest playboy.

**ARLEEN TUOMI** — Unlike most of us this bright eyed beauty has her whole future planned to raise at least ten "little Hurdons". Even though she writes a twenty page letter every day, she manages to get her homework done and comes up with some shockingly intelligent answers. Her chief complaint is the high cost of long distance calls to Waterloo. Arleen plans to go to Teachers' College with the purpose of reforming the system of public school teaching.

**RICHARD BLADEK** — Rich can be found every Friday night at the Griffon diligently persuing his favourite hobby. This humorous and likeable character has few peeves but he is human. It is his considered opinion that knuckle crackers must be removed and water wars in physics ceased. Rich an ardent sportsman he favors skiing, curling and floor hockey.

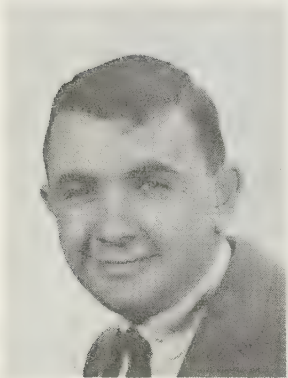

**BILL DAVIDSON**—Next to his girl, Terry, Bill's interests lie in cars and creating a disturbance in chemistry class. Bill's usual excuse for missing early morning classes is that he had to pick up a poor helpless girl on McIntyre St. I wonder who? Best of luck to Bill who hopes to go into Electricity but will probably wind up washing diapers and handing out cigars.

**TERRY HALL**—Terry hails from a metropolis along the North Shore—Terrace Bay, in fact. He goes for parabolas, books, and other guys' mints. His intellectual appearance is very misleading as he's in love; but he hasn't told the other party yet. His ambition is to take an Honour course in History.

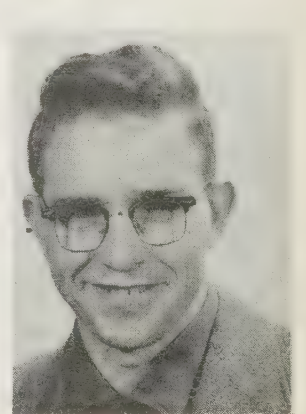

**BARRY (FLOYD) DUKE**—Barry can usually be found fighting naval battles in the hall, aimlessly quoting French phrases searching for a feather for his football helmet or walking with his beloved Caroline. Barry a veteran scholar having participated in many activities ranging from Lakeview's first Student Council President to his annual positions on the football, basketball, hockey and curling teams.

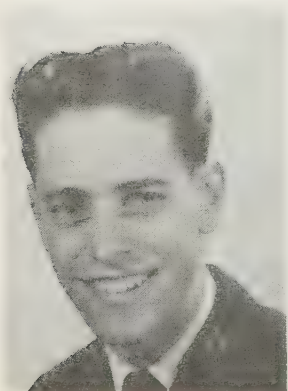

**TIIT NURMELA**—Tiit "Gunther" Nurmela is one of our schools most ardent sports enthusiasts. He has participated in football, curling and track, but why didn't he appear on the basketball team this year? Pinky has little difficulty in skipping classes. Tiit's quiet disposition and natural wit are the reasons behind his popularity with both sexes.

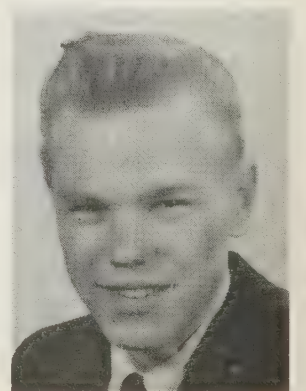

**JACK EDWARDS**—Ambitious is the best word known to describe Jack. In Sept. he was elected Pres. of S.A.C. At present Jack's ambition in life is to be the world's first modern Physicist to disprove Einstein's laws and most other physical formulas. Thousands of Grade 13 students longingly await his day of success.

**GLEN PATTYSON**—Although "Butch" participates both in football and curling his favourite sport is an early morning water fight in Physics class. His future is destined toward the field of Engineering and with his good marks, he should make it. Presently his only gripe is a car that won't start on our cold winter mornings.

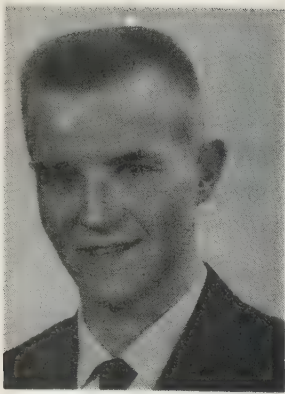

**DENNIS FAIRBRIDGE**—Den has a lot of hidden talents and he sure does a good job hiding them. He is an enthusiastic curler; enjoys a broomball game in place of homework and he likes dubbing around the golf course. His pet peeve is those expensive hotel rooms in Fort Frances. Dennis seems to like working with "figures" and plans to enter Accountancy upon graduation.

**DENNIS PEDERSON**—In five years or so of high school, Denny has gone a long way—St. Catherines to be exact. He's the leading tenor sax player in the school band, in fact, he's the only tenor sax player. Seems as if he's destined to be a "Saxy Astronut", under the tables at "Joes's Bar Room". Seriously, Denny is a nice fellow.

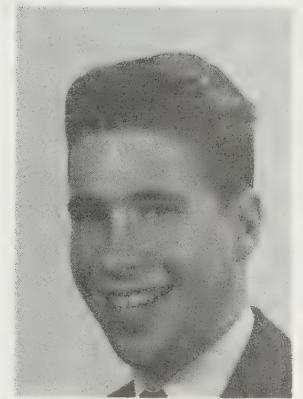

**MELVIN "Dobie" PETERSON**—Although Mel hasn't any trouble with Thaelia, he encounters some difficulty with "Shanks" Pingree. Melvin's favourite but ironic expression "Spoiled my act as a patch" accounts for his devoted interests in winning the golden fish hook in French. Mel's ambitions are yet unknown but we are sure that he will be a great success.

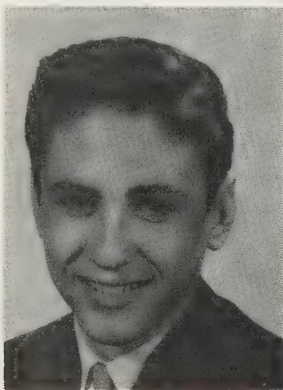

**JOE "Puncho" SCHACK**—Joe, the "Bruce Kidd" of Lakeview High devotes most of his time to either practicing with a G9 named Gwen or pushing buggies at Loblaws. Although Joe intends to major in languages and become an overseas Teacher in France, we are confident that he will wind up tutoring either Brigit B. or Jayne M.

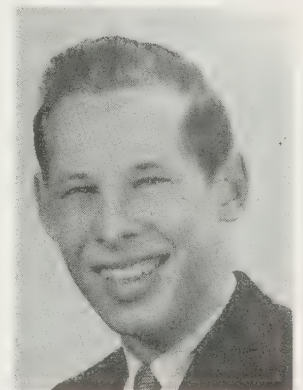

**JIM POLING**—Jim's ambition in life is to take a long trip on his scooter and see how many girls he can meet. He enjoys broomball, mixed curling and often goes hunting or fishing. Jim likes to sleep in Mrs. W's class and is puzzled to no end by algebra. His pet peeve is a certain French teacher and he hopes to be a millionaire.

**DON THRASHER**—Don is a nice guy who generally minds his own business. He has decided to go to General Motors Institute so you better buy your cars now before he hits Detroit. Don is also an ardent sportsman and plays football, poker and other assorted games. However, his luck isn't good, and if the gambling bug catches him he may take up residence with Freddy F.

**TED POLLOCH**—Ted, likeable playboy, as well as working up to a Northwestern Ontario curling championship as a front, has a most virtuous pastime managing Anne, Tina, Evelyn, Mickey and now Eleanor. Although he'd like to be a Chartered Accountant, we think he'll likely end up a bookie or a fallout shelter attendant.

**LAURIE TULLOCH**—Laurie is one of the more active "boys" who has been very active in Air Cadets (he went to England on Overseas Exchange last year), football, Students' Council, Band, N.C.O. Club (he is Pres.). He is slightly addicted to "les jeunes filles" but is now somewhat settled down. As this boy is "way out", we know that he will succeed in his ambition as jet pilot.

**BOB SANDBERG**—Bob hopes that this will be his last year at Lakeview; from here he plans to attend Teachers' College. Bob believes in simplicity and in keeping with this theme he has streamlined his time table by having as many studies as possible. Occasionally "Study Sandberg" has lapses of memory and Mr. C. demonstrates his vindictive nature towards those who "Forget".

**NORMAN BROWN**—Norm can be found any night at the Brent Park rink playing broomball, and although not an outstanding goalie he fills the net pretty well. His ambition is to be an Engineer but lets hope he builds his bridges far from this area. He is very active in teen club affairs, loves English and just can't seem to write enough composition.

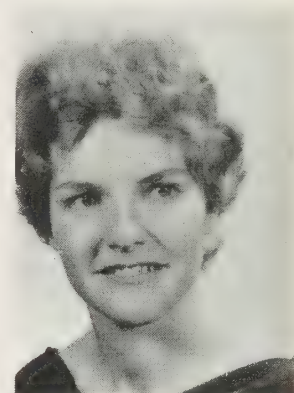

**CLARA BOEGH**—This is the only gal we know who usually keeps quiet and lets others do the talking. She never ceases to amaze us by holding down positions at the top of the class and on athletic teams. What Clara intends to do next year remains a mystery but she will probably enter the teaching profession. Active in Young People's and an ardent bowler, Clara is a faithful dispenser of homework.

**CLAIRE MacRAE**—Claire has been able to combine intelligence and sweet looks with the talent for designing and sewing all her own clothes. Driver Training, Teacher's Club and her position as Reserve for the Magnificent Seven, manage to keep Claire out of mischief. She plans to enter Teachers' College in the Fall—and then?—why raising little cavities to keep Daddy busy of course.

**BARB HALL**—Next year will see this lovely gal cheering the patients at Grace Hospital in Winnipeg. With her efficient manner and bright smile we all know Barb will be a wonderful nurse, especially since she received some practical experience this Fall? ? Besides maintaining top marks, singing in the Church Choir and attending C.G.I.T. Barb plays in Lakeview Band and on the basketball team.

**DIANNE PETTIT**—This sweet Miss plans to enter Uni. in the Fall where she will major in History and English. On completion of her education Dianne plans to teach high school. Dianne enjoys skiing, swimming and seems to have a uncanny zest for meeting trains in the middle of the night—or could it be that she's just waiting for a special passenger by the name of Reg?

**ULLA IDMAN**—Another of the Magnificent Seven, Ulla plans to take Physical Education at Western U. next year. She maintains good grades in school and has her own dancing class on Saturdays. Ulla never ceases to amaze us with her agility in gymnastics and her patience with squeamish zoology partner. Ulla looks her cutest with scalpel in her hand.

**SUSAN VALLEY**—For the past five years "Robin" has been an active member of S.A.C. and in charge of many gala L.H.S. events most notably the Mardi-Gras Ball. However we musn't forget those great blue eyes and the flashing smile which have won r. ny a young man's heart. A future Social Worker, Susan will do exceptionally well if her own social life is any indication.

**MARGURITTA KLUENSCH**—The luckiest female in the class, Marguritta is envied by us all for she's already caught her man. A natural in English and German, Marguritta plans on an Honour course at University next year. Although she started skiing this year she limits her extra curricular activities to looking after Harold. To this girl whom we all admire, go all our best wishes.

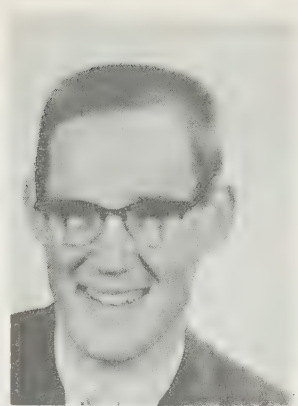

**BEV WILKINSON**—This is the only gal we know blessed with that winning combination of looks, brains, personality, and a wonderful enthusiasms for anything that's fun. Youg People's, Basketball, working on the Revue and the Mardi Gras and her beautiful horse Blaze, all fill her days to overflowing. Next year will see Bev at Waterloo.

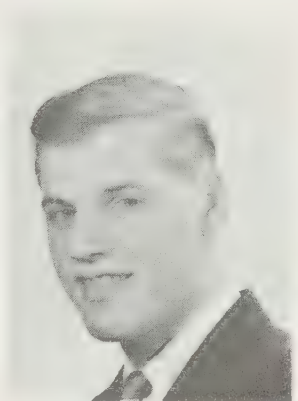

**ROY FOSSUM**—Roy, a happy go lucky, loveable chap from General 13B has hopes of becoming an Architect, and we all wish him luck in this endeavour. He has many hobbies, but interestingly enough, they all seem to centre on girls. Anyone in particular, Roy? Roy is one who discovered early that school and night life doesn't mix. Best of luck, Roy.

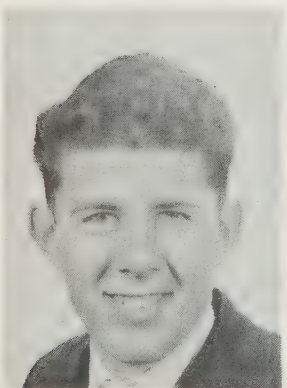

**DAVE KRULL**—This intelligent (?) clean cut character is Pres. of the Camera Club and uses the darkroom mainly to see if blonde hair and blue eyes shine in the dark. His hobby is building two-way radios. He can be heard competing with CJLX on all radios within a four block radius. He would like to be an Engineer.

**ALAN HULKO**—Alan is often found playing "tap roulette" during the lunch period. He rarely seems to win though. Much of his spare time is spent with his 54 Merc. Any time left is spent wearing out Arthur St. Searching for anything in particular? His future is somewhat in doubt but his keen interest in figures and geometric curves is bound to get him somewhere.

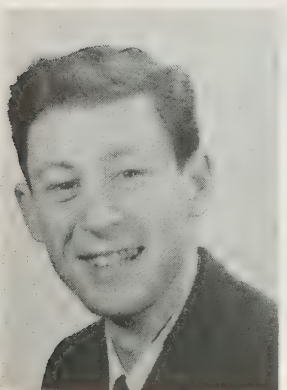

**EUGENE LYSY**—Eugene (Beatnik) is a very well known, well liked person around Lakeview. Eugene's athletic interests include hockey, football and curling but lately he has shown quite an interest in a certain girl from the commercial wing. Eugene plans on taking a course at Lakehead College next year. We all wish him luck in the future.

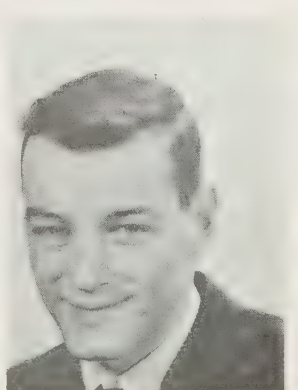

**LARRY HOLSETH**—Larry is G13A's mathematician and is continually being approached for help during study period. He plans to turn his mathematical ability toward a Chartered Accountancy. Larry belongs to the select circle of G13A's top handle twirlers and makes worthy donations toward this organization. His pet peeve is a certain History Teacher.

**BOB PAVLETIC**—Although a late arrival at Lakeview, Bob has distinguished himself not only with the girls and tackle on the football field, but also for attaining the high rank of Sergeant in our Lakeview 649 Squadron. Whatever University Bob enters to complete his education we know he will make an excellent Rep. of Lakeview.

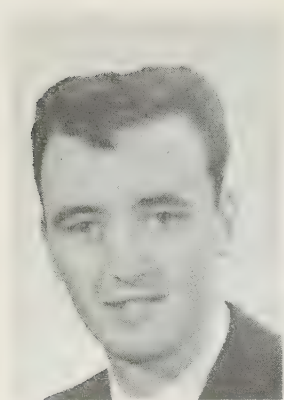

**TOM KELLY**—An integral part of the "Rovers", Tom devotes a great deal, if not most of his spare time making his fellow students happy. This last year he figured prominently in several assemblies, the Lakeview Revue and was a booster for our successful Mardi-Gras. "Kelly-wegs" applies himself well and we can truthfully say that he is an asset to Lakeview High.

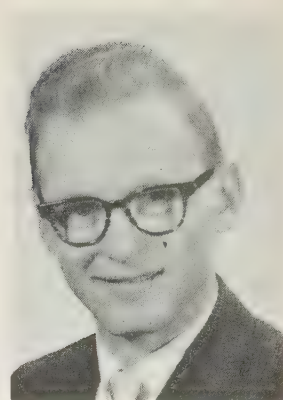

**LARRY PINEAU**—Although Larry has left us he won't be forgotten. Thanks to his athletic efforts he has helped the Sr. Lions to their championship. The basketball and ski teams have also benefited from his help. Perhaps a career in Banking is ahead of Larry, seeing as he has dabbled at this already.

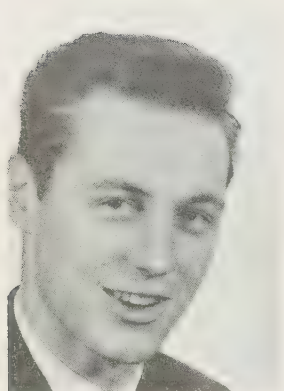

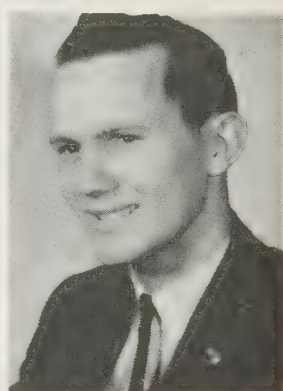

**DAVE ROBINSON**—Dave's main interests in life are a certain female and to own a car that won't fall apart from under him. He also fits homework and playing his guitar into his busy schedule. We are certain that he will reach his goal of becoming an Electrical Engineer.

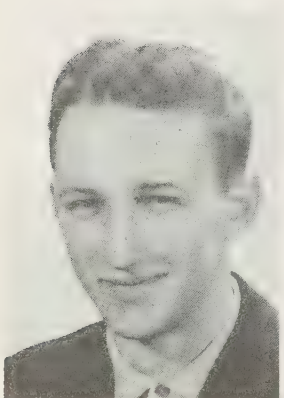

**GLEN SCOTT**—Glen is a reliable conscientious student. During his stay at Lakeview Glenn has been an active member in the Drama Club and has played the key part in the plays presented in the Lakeview Revue. Glenn's pet peeve is getting up in the morning for early classes. He expects to go onto university and become a High School English Teacher.

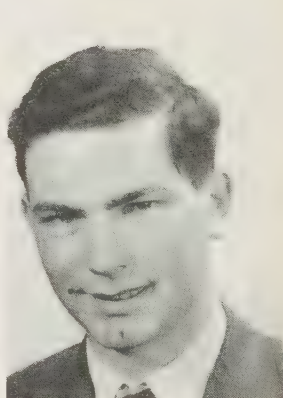

**TIM SADGROVE**—Tim is the dark haired romeo of G13. He spends most of his time checking honeys. The rest of his time, he is busy studying. He plans on going on to Uni. and later becoming a Teacher. We wish Tim the best of luck.

**DON STOREY**—Alias Tom, he is a hard working, conscientious lad of G13. His pet peeve seems to be Trigonometry and his main ambition is to pass his English. In the not too distant future, he hopes to enrol in an Electrical Engineering course, and if he works as hard at this as he does at curling we are sure that he will be successful.

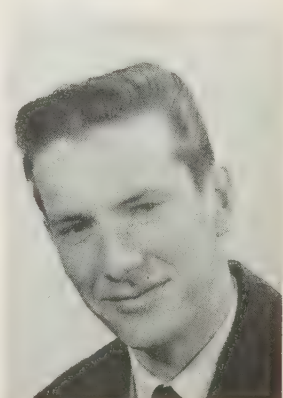

**TONY SCHAEFFER**—Tony is one of the more personable young men in our room. He is one of our form Reps, on the Students' Council and works very hard for us and the school. If Tony puts the same energy into his work as he does into dancing at the "Y" he is bound to be a success.

**PETER STORY**—Peter has aspirations of being a Mechanical Engineer and he is almost certain to attain his goal. It is rumoured that he was instrumental in converting one of the science lab tap handles into a roulette wheel for noon hour amusement. His pet peeve is his younger brother who persists in bothering him while he is participating in his noon hour sport.

**RON SCHIELKE**—Ron is one of Lakeview's imports from Hillcrest. Ron's ambition is to be a "real" pool shark and win a pool table for his bedroom. Ron can usually be found "shooting" pool in Cory's on the weekend when he can't study—girls. Ron's aim is to pass 13 and go into Accountancy.

**JIM SWEET**—Is a fellow who as the name applies is just a "sweet" guy. Jim is one of Lakeview's more successful curlers. He played football too. He also flips for one of Lakeview's former cheerleaders, Carol K. Jim plans to become an Architect. In that aim we wish Jim all the luck.

## GRADE 13 PERSONALS (Photos not available)

**CAROLYN CRITTAL**—This ambitious gal is a morning student only as she spends her afternoons either out at the College or taking organ lessons. Next year Carolyn plans to enter nursing at the Nightingale School in Tor. She is an active leader in Young People's and an avid skater, swimmer and seamstress. Her pet peeve is waiting for Barry, and she's seldom seen without her pleasant smile.

**PETER GALESLOOT**—It is hard for anyone when walking down the halls of L.H.S. not to notice tiny Pete (6' 4"). The first thing which meets your eyes when you look up is his friendly smile. Due to his respect to the smaller guy, Pete does not lack friends. Pet peeve—staying awake in history.

Why?

**MIKE JEFFREY'S**—Mike is a dark handsome chap with a friendly smile for everyone. At times he can keep you laughing with his jokes, and at other times he is the serious type. P.P.—Chemistry. Favourite saying—"Oh, Gee!"

**BILL RICHES**—Gipp is one of the high school's veterans, he has seen many a famous person come and go. Bill rarely gets more than a tongue lashing from the teachers. Favourite saying—"Venez ici baby."

His ambition is to pass into Grade 13, and his pet peeve is his seventh period.

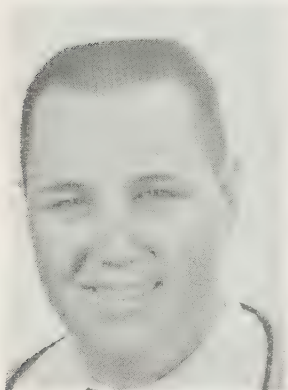

**ROY WILLIAMS**—Roy, the mad scientist of 12C is just as likely to blow up the school as Mr. B. with his whimsical queries and after hour activities. His favourite saying is "Golly Gee".

**MAURICE (Moe) ZAKREWSKI**—Moe, who has just discovered the opposite sex, is also active in sports. In class he tries to concentrate on history, but he sometimes finds this very hard especially if he's thinking of last night's game. Favourite saying—"What do you want Fred?" P.P.—Homework.

**BILL WEDGERFIELD**—Bill's marks are no indication of his intelligence. He is no mathematical genius, but this doesn't cramp his calculating ability in pool. ## FOLLOW THAT BALL

When the frost is on the pigskin  
And the halfback hunts a hole,  
When the muddy linesman digs in  
With his back against the goal,  
When the cheers crash out like thunder  
And the quarterbacks the call,  
Comes the play—and now I wonder  
Who in blazes has the ball?

Someone's handing off to someone,  
Someone's fading back to throw,  
Some one fakes, then makes an end run—  
Which one has it? I don't know.  
But someone is a great magician;  
Someone down there sure fooled me.  
I wish he'd fooled the opposition—  
We just lost nine yards, I see.

—TED MAVOR, G. 12B.

## THE WAVE

I stood upon the ocean's moonlit beach,  
And with a fragile reed I traced upon the sand,  
    "Sweetheart, I love thee."  
A WAVE  
Came rolling by and erased the fair impression.  
Cruel wave!  
Frail reed!

Treacherous sand!  
I'll trust thee no more—but with a giant hand  
I'll pluck from Norway's shore her tallest pine,  
Dip it's tip into the crater of Vesuvius  
And on the high and flaming sky, I'll write  
    "Sweetheart, I love thee"  
And I'd like to see some stupid wave wash that out.

## MAN

Man is like a lion,  
King of all the beasts:  
When he has destroyed his foe  
He begins to feast.

Man is like a rich mansion,  
Built upon the soils;  
When he begins to crumble  
Others take the spoils.

Man is like a vulture,  
Hovering in the air;  
He might attack his half dead prey  
Not caring—foul or fair.

Man is like the northern lights,  
Rivalled by all the best;  
They may try their hardest  
But he is better than the rest.

—GESTAH POE.

# SPRING FEVER

BOB ANDERSON, G11C

Spring fever is not usually a serious disease, yet it can affect some people much more than others, and it is extremely contagious under certain conditions. It is most rampant in the months of April, May and June, and for many individuals it returns year after year.

Although the actual cause is not known, many factors are thought to contribute to it. Some of these factors cannot be avoided, while others, people do not want to avoid. Melting snow, a warm, balmy western breeze, and a warm bright sun can add up to a very dangerous condition. Symptoms brought on by a situation such as this will include a deep yearning to leave the school for a day, a feeling of discontent, evidence of homework not being done, and an overall lack of interest in studying. Many chronic sufferers, particularly students, will find it impossible to remain cooped up in classrooms and study halls while fish are jumping and leaves are budding. It is not advisable to try to chastise or suppress these people, as at times they are dangerous, and may resort even to smashing their well-meaning advisors over the head with a fly-rod.

Later on in the season, perhaps during May and June, both males and females of the human species can be affected. At this time it is the younger members of society who usually contract the fever. In fact, once the snow is gone, the streets are bare and the flowers are blooming, it can reach epidemic proportions among the teen-aged group. It has been estimated that 99.44% of the adolescent population is affected to some degree. Effects of the fever at this stage include a tendency for the young men and women to do a lot of driving around, often with all the windows down and several people hanging out. This sort of behavior is upsetting to many of the elder members of the community, especially policemen, teachers, and the like, but, there is no known remedy or cure for it. Young male sufferers can often be observed standing on street corners, watching girls walk by, admiring latest styles in short skirts, and generally stumbling about in some sort of daze.

It is hoped that non-sufferers of spring fever will not become important or angry with those unfortunate enough to have contracted this terrible disease, and it must be remembered that no amount of scolding, yelling, punishing, or discrimination will cure or bring about a change in the unfortunates. Medical science has found no cure for it, and it looks as though Spring Fever, like the common cold, will be with us for a long time.

## AND IN THE BEGINNING

JUDY HAGLUND, G12A

These last seconds were unbearable. The months of waiting were at an end and the curtains were about to open. Slowly they parted and as the budding actress stood upon the stage, she felt that all the hard work had been worth it. She slipped into the familiar lines and her nerves relaxed, allowing a part of her mind to drift back over the previous months of rehearsals.

These scenes moved in procession past her eyes. Louis Hebert chuckling about a cartoon drawn on his Valentine; the deer's head peering around the curtain with a look of puzzled wonder; Werneck's "invention," a different one each time and all looking like escapees from Joe's Junk Yard; the chocolates filched from Annabella's box—all these brought a warm glow of friendship with the others on-stage.

Next year there would be memories, all the more precious because of their fleeting existence. There might be wonderful sessions—"Remember the time Louis . . ." "I nearly died laughing when you rolled up the magazine . . ." "And when Michael just stood there glowering . . ." "Remember how Marie threw you the wrong cue?"—when the gang got together and relived the whole play.

Surely no other group of students had ever had so much fun producing such a masterpiece." The make-up crew, stagehands—yes—even the director were the best to be found anywhere. Not that they were all experts! No, indeed! This was a high school play, after all, and the entire troupe started off just as inexperienced. No other group had ever put their hearts into anything more than this one. However, now the practice was at an end and it had done its job. But all this had been a rewarding experience, not the bore it might have been. Now, if only the audience would feel, as the cast did, that the production deserved some praise, however small.

The last of the action was over now, and the curtains closed, leaving her with an empty feeling. Then, in a daze, she heard a roar of applause, and as the curtains swept for curtain call after curtain call, the cast grinned self-consciously; all the work *was* worth it. They had succeeded! They—a group of amateurs—had been termed a success!

As the audience wound its way out and the lights flicked off, she stood on the stage and looked over the darkened house, and she knew that, no matter where or for whom she might act in the far distant future, no applause could ever seem more important, or sound sweeter to her than her first, here.

## WHAT EVERY TEACHER SHOULD KNOW

SUSAN HUGHES, G12A

Each day Miss Bowing would stand at the front of the room and would issue forth, in a deadly monologue, the merits and events of history. Between writing on the board and pulling down maps to illustrate a particular, the professional student might have written a note and had it passed almost around the room in which case, the students—having read the note break out in broad toothpaste smiles. Upon looking up from her map of Asia, Miss Bowing is confronted by these smiles and is obviously bewildered. Each teacher should know that there are students who get enjoyment out of watching a teacher who is completely baffled and bewildered as to what is going on in her room at certain times.

This note passing is only a simple achievement which almost everyone can do with some air of dignity. Sleeping, on the other hand, is not to be attempted by everyone. There are those who can be certain they will be called upon to answer some questions or be called upon to give some quickly thought up opinion on the troubles in the Far East or Asia Minor. It is the student who has the reputation for never knowing the answer that can successfully sleep in class. Of course this is not always the case, but in general it holds true. All that is necessary is that the student sit behind a well built fellow student, preferably at the back of the room in the far corner. He merely piles his books up on the desk, opens his history book, studiously leans over his piled books to pursue his history text and promptly falls asleep. He can expect to remain in this position for about fifteen or twenty minutes, after which Miss Bowing will inquire about his health suspiciously. The students around the successful sleeper take great delight in watching him perform this skill.

Among the many tricks and pranks students try on teachers, the most common one is the shoelace trick. At a designated time—exact to the second—each student in the room bends down and does his shoelace up. This rhythmic movement is completed by the upward swing of the body to its original position and the joyous triumphant faces of the students. It's a beautiful sight to behold; for once everyone is doing the same thing at the same time. Of course the teacher, Miss Bowing, becomes very indignant and tries to show her disapproval but never quite makes it. Students and teachers alike enjoy this trick, but in small doses.

For the most part teachers are busy trying to educate us and do not always see the many intricate occurrences in their rooms, or at least that's what the students think.

# OUR NEW PROVINCIAL SPORT

SUSAN VALLEY, G13B

Although few people are aware of it, lacrosse is Canada's national sport. Most people, if you were to ask them, would name football or hockey as our official game. But popular as these sports are, an entirely new phenomenon is sweeping our fair province of Ontario. I refer to the annual testing of Grade XIII students or the "Departmentals," as they are called, which is fast becoming our favourite provincial sport.

Grade XIII examinations are composed for the Department of Education by university professors of the various subjects at the university level. These professors have no idea of the degree of concentration on each particular part of the course, nor are they themselves actively teaching Grade XIII.

In the marking, as consideration is made regarding the nervousness which the applicant might experience, his attitude toward school, his daily work or most important the purpose for which he is trying to obtain his Grade XIII diploma.

Under the present system a student who excels in mathematics may be delayed for two or three years, or perhaps prohibited entirely from taking a university or accountancy course consisting entirely of mathematics because of a lack of a language or an inability to balance chemical equations. Instead of a brilliant career in teaching or research, this same student may be stuck behind a cashier's wicket in a bank for the rest of his life—neither a lucrative nor a rewarding position.

From all sides the high school student is pelted with such pro-education slogans as "Stay in school now so you will stay employed later," and "The job always goes to the graduate." Although students seldom doubt the validity of such statements and usually realize the dividends reaped by a good education, they too often experience a feeling of insurmountable frustration when confronted with Departmentals.

It is the common consensus of opinion that the Grade XIII course poses a greater challenge than any of the three years of a bachelor of arts course. If the student was left to form his own opinion of the work, he would no doubt approach it calmly and objectively. But when he has been forewarned repeatedly during the preceding four years by his teachers, parents and friends, he begins to search for difficulties which are really non-existent; and if he finds the work within his scope, he is surprised and suspicious.

From the first day of school in September, the student is working toward one goal—the finals in June. Teachers constantly refer to them and include in their daily work questions from former departmental examination papers. Most teachers try to help their students by making predictions as to what will be on this year's final examination. All these things plus pessimistic advice from former students, many of whom have not been successful, all help to build up the tension. Christmas and Easter fly by on greased wings, and on the home stretch the students assault their books at a still more feverish pace. Finally the students finish their last class and have a free week to cram in the last bits of knowledge. Many live on coffee and go without sleep during these seven days. And then about the time of the first day of summer, at the most beautiful time of the year in fact, the poor victims file into the examination room while in Toronto the educational heads smack their lips, rub their hands together in childish glee and hold a gallup pole on the number of failures permitted this year.

It is not time to take a more comprehensive view of this rigorous last year of high school? Is it not time we realized what the strain of these ten tense months is doing to the more sensitive, less carefree students who are anxious to succeed. Granted, much research would have to be made before a solution could be reached. Perhaps it lies in the granting of separate honour diplomas in the fields of mathematics, sciences and languages, one for those who intend to go to university, the other for those who do not. But wherever the solution lies, I hope, for the sake of thousands of promising young Canadians, it is found soon and our latest provincial sport is abolished.

# IMPORTANT

HARRY HAKOMAKI, G12B

"Important: read this carefully."

Everything comes with directions these days. No household appliance is complete without a ten page booklet explaining how to put it together, where to install it, which way to wind it, when to change the filters and what to do if it starts humming. It is difficult enough to cope with the gadgets themselves, let alone try to understand the explanations.

I can't do anything anymore without being told how. There are shaving instructions with your electric razor, refill instructions with your ballpoint pen, drycleaning instructions with your shirt, and zipper instructions with your trousers. A tin of aspirin contains more instructional literature than pills. I know that the manufacturers are trying to make life simpler, but I am getting more confused all the time.

Even familiar products arrive with an elaborate set of directions. The other day I bought a tube of toothpaste, and it said on the box: "To remove cap, grip tightly and turn counterclockwise. Important, do not tilt." Now, I've been taking the tops off toothpaste tubes all my life, but the more I studied this description the harder the operation seemed. I got a good grip on the cap and turned counterclockwise until I began tilting. Finally, the bottom of the tube split open and the toothpaste squirted down my arm. Fortunately there was some left in the old tube, and its cap had been missing for months.

The trouble is that I can't absorb directions. I can pick up a folder and start to read, "For best results read this carefully," or "Congratulations! You are the proud owner of such and such," and right away my mind begins to wander. Maybe it is because the writers of these manuals can make a simple task sound as involved as operating an electric computer.

Take garden seeds for example. I can remember when all you had to do was stick them in the ground. Not any more. Today the packet reads: "Plant to a depth of  $1\frac{1}{2}$  times seed in well-drained soil between May and June (Northern Ontario), and then to 4" after ten days." Prescriptions on medicine bottles are just as obscure (how can you take ONE pill three times daily?), and first-aid instructions have me completely baffled. By the time I figure out how to open a bandage, I've almost bled to death.

Women don't seem to have the same trouble with directions as men, but this is because they make up their own as they go along. My mother has a prize collection of recipes, but whenever she begins to cook something, she merely adds a pinch of this and a dash of that. When it comes to giving directions to someone else, though, a woman is a veritable model of efficiency.

The other night, my father, wanting to be helpful, decided to vacuum the living room, but he couldn't find the button to turn the vacuum cleaner on. Slightly baffled, he shouted for directions from mother, busy in the kitchen. Whereupon he received the following instructions: "Look under the big black thing on the side. You'll see a thingamajig right next to the whatchamacallit, and besides it is a small round gimmick. Well, it's the little doodad behind the other one."

On the other hand, I can give directions very clearly. If you're planning to drive to our house, for instance, just stop at the service station and ask the attendant how to get there. He's the one who always tells me.

## BRIDESMAIDS

Each year our school enters a senior team in the Senior SSSAA Football League. Here again Lakeview seems to surpass all other contenders, in spirit and strength. Granted we have only won the coveted senior trophy once out of four years in the league we have always been one of its stronger entries. In '59 the first of LHS steel Sr. teams made its presence felt by finishing third with the more established schools Hillcrest and Selkirk below them on the standings. Last year the 1960-61 season our Big Blue won top honours for the first time in the history, short though it is. Also for the first time Bobo was packed into a bus and sent up to Red Lake to play for the Northwestern Ontario Championship. With time running out the Blue and White was holding Red Lake in their own end of the field. When the gun ended regulation time Lakeview was in possession on the Red Lake 1 yd. line and the score was tied at six all. It is history that Bobo tired from a long trip and the greatest fight of their lives, lost out in overtime by a score of 12-6. We said we would return!

This year 1961-62 our Senior Lions once again took to the field. They represented L.H.S. at the Bowl Game taking part in what was termed the greatest Bowl of them all ending a tie 14-14. Despite all attempts, however, once more the boys were bridesmaids finishing the season with a second place tie with P.A.C.I.

What is it that makes a school turn out strong teams of the calibre of Lakeview Senior Squads year after year? It must be that undefined something in Lakeview's school spirit that gives the boys that extra something. Our coaches are of the highest calibre. Mr. Boquist is the finest strategist of the S.S.S.A.A. loop and one of the greatest men for spotting weaknesses in any team. Always quick to seek a new twist to the old game Mr. Boquist is the first I know of to devise of giving a line man the ball. The Guard draw was used by our Senior Squad this year. Congratulations to Mr. Boquist for his fine work with football and taking such an interest in the students of his school.

## SPORTS SECTION

MORLEY MITCHELL

Without a doubt the surprise of this year's "World of Sports" at Lakeview was the unexpected dominance in the Junior Football League by our Junior Lions. Every student is proud of the boys and the way they put their heart into winning the championship, to bring the cup back to Bobo's den where it belongs.

The team started the season off with a seemingly strong defensive unit but an offence which lacked the necessary power punch. However, as the team began to win contest after contest the K.O. right grew and grew and grew.

This was due to the work put in by the team as a whole but there were a few stars to be found in that first-string back-field to whom a lot of credit must be given.

Tom Morton is one of Lakeview's top all around athletes. He proved to be the man the team needed to call the signals. At all times he was a smart quarterback and a great player.

From what we saw of Charlie Morton we would have to say he was definitely one of the top rookies. In one of the Junior practices "Ole Tom" broke into the clear for what appeared to be a sure t.d. Brother Charlie really does throw a mean tackle, doesn't he, Tom. When Charlie hit his older brother I don't really know who got the worst of it because the coaches had to pick both of them up off the ground.

After a one year absence another honour returned to Lakeview on the shoulders of Ramblin' Roger Olmstead. In a down to the wire race Roger won the SSSAA Junior scoring title. Heartfelt congratulations go out to Roger from all of us on this account. It seemed that as Roger rambled so rambled the Junior Lions.

It took three games for Maurice Hogue to get used to the game he was playing as a rookie and from there on in he was the "drivingest" fullback on the squad. He scored 24 points in the last 3 games of the regular season and was a star during the championship finals. By the end of the big game Maurice had made his total grow to 42 points.

Ed Sas, Olmstead's wingmate, had himself a good season for the Lions. Just a shade under the speed of his wingmate, his best play was through the 5 hole on the left side of the line. Ed ran that play into paydirt twice in the finals as well as racking up a lot of yardage with it.

Bill Kallio was our top halfback during the past season. Unfortunately for Bill he seemed to have the knack of scoring t.d.s. on which linemen got called for such things as clipping, offside and so on. Always a strong competitor, he was a hard man to bring down.

There are many stars we have not mentioned here. Players like Norman Kroker, Wally Harbluck, Garry Kushner and Sandy Ligate to name but a few. They made up the greatest Junior Club in Lakeview's history and most of them graduate next year to Senior Ball. For this reason especially I have not dwelled on the younger spirit. Their year is coming on. To them I say this: if you put your heart into the team and your shoulder to the wheel, you'll do okey. With sensational coaches like Mr. McIntyre and Mr. Vukovich you just can't go wrong.

## SENIOR BASKETBALL

Mr. Hanley was the new Senior basketball coach here this year. Like Mr. MacDonald he inspired his team to backing him to their positive limit. This was shown when a rift appeared in the Senior team due to the loss of several key players. Rookies who had never played in competitive basketball played their hearts for their coach although the end was inevitable.

Certainly it is true that our team lost its remaining games of the season but it is important that this be known. When our Seniors lost their key players they could have dropped out of the S.S.S.A.A. league but this was not the course chosen by a L.H.S. team. This is the type of showing of team spirit which makes me proud to be a part of a school where such a spirit is possible and does in truth exist. Congratulations Mr. Hanley for a job every person connected with Lakeview can be proud of.

## JUNIOR BASKETBALL

This year a new pair of basketball coaches came to L.H.S. Mr. MacDonald who took the Junior squad won the support of his players on their first meeting and the hopes of all Lakeview supporters. One of our stronger Junior contenders vied for team honours. The boys got off to a good start but seemed to bog down as the season progressed.

Strong for the Junior entry were Gary Kushner and Tom Morton. When these two were on, the team in general seemed to click and get behind them. Our Junior team made the semi-finals but bowed out to the Fort William Collegiate squad. Lakeview is building and so watch that team go next season.

## **Assemblies . . .**

### **NOVEMBER 10, 1961 — REMEMBRANCE DAY**

To mark Remembrance Day, 1,000 students of Lakeview High stood with their heads bowed for two minutes of silence at a special assembly this morning. The service began with a colour guard of the three armed forces marching in slow

procession up onto the stage. Guest speaker, Lt. Col. A. H. Evans, O.B.E., spoke of his war-time service and the meaning of Remembrance Day. Pat Stamp sang the hymn Oh Valiant Hearts.

### **NOV. 15, 1961—THIRD ANNUAL BAND CONCERT**

The third annual Band Concert was held on November 15, 1961. The Glee Club sang a few numbers and the band presented a variety of music, going classical to hits from the shows. Smart gold

plumes for the band hats will be purchased with the proceeds and will certainly add a noticeable touch of colour to the uniforms.

### **DECEMBER 22, 1961—CHRISTMAS ASSEMBLY**

The Christmas Assembly was a great success. One of the highlights of the afternoon was the debut of the "Rovers," a group comprised of Morley Mitchell, Tom Morton, Kelly and Brian Forester. The boys sang many ballads. Eleanor Pederson and Francis Woolloch played a very enjoyable accordion duet. Continuing in the musical vein our mixed choir sang some of the favorite carols as the Christmas story was being told. Malanie Huber, Pat Stamp and Mr. Jewitt each favoured us with a Christmas carol. The S.C. presented the women teachers with corsages and the men teachers with

boutonieres. One of the surprising features of the assembly was a quintet who called themselves "The Sisters Five." I never knew that Norma Robertson, Arlene Tuomi, Gloria Harrison, Lucy Pingree and Irene Harasymew were sisters? Every Christmas Assembly needs a Santa Claus and ours was Eugene Lysy. Willie Opie plus a huge red bow and a large diaper rode around on his tricycle trying to help Santa but intentionally he proved to be more of a nuisance than a help. Jerry Gothard acted as master of ceremonies. The whole production set the scene for the holiday festivities to come.

### **MARCH 2, 1962—LAKEVIEW REVUE**

This year the Lakeview Revue was divided into two separate acts. The first was a one act play, "The Courting of Marie Jenvrin," the second was "Under the Big Top."

The Courting of Marie Jenvrin, a comedy, took place in the far north. Judy Haglund took the lead while others in the cast were Alec Cooper, Maureen Hodgins, Brian Drechsler, Lionel Haigh, Glenn Scott and Calum Varey.

The circus theme was depicted as the Glee Club sat in stands, set up on the stage, portraying a circus audience. The Glee Club sang several songs and the girls' ensemble sang a medley from the

Broadway play, "The Sound of Music." The "Rovers" and Bob Fiorito and Eleanor Pederson favoured us with two accordion duets; Ted Mavor, Jack Shannon, Dave Innes and Jack Edwards amused us with their crazy antics as the circus clowns. Our ring mistress was pretty Arleen Tuomi who kept everyone informed of the events in regular circus fashion.

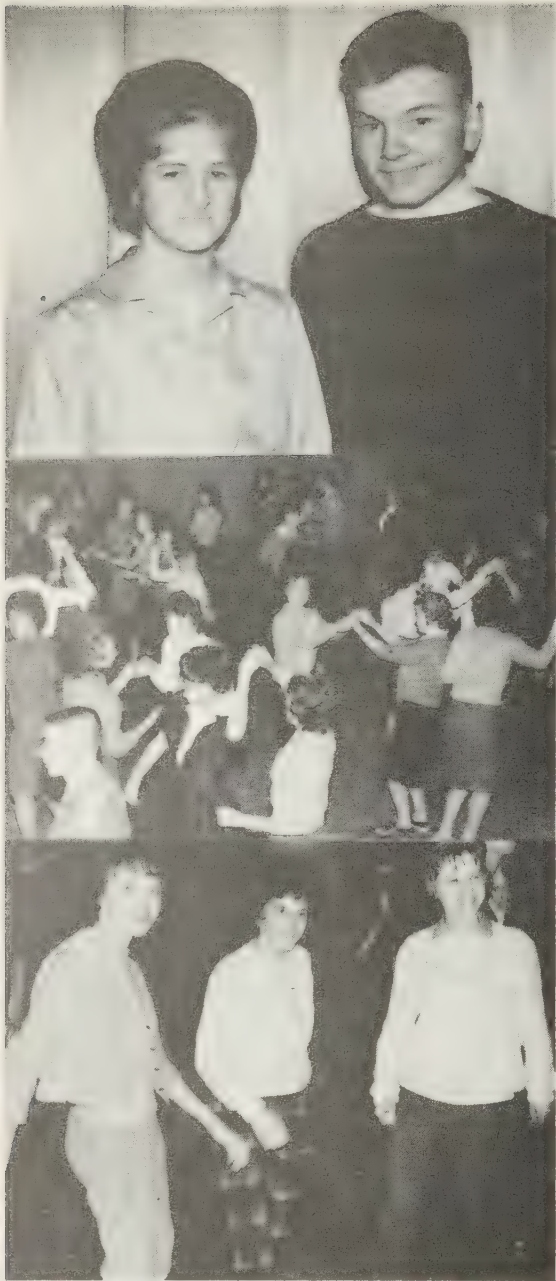

Thanks go out to Miss Coolen, who directed the play, and Miss Rodgers, who produced "Under the Big Top." Because of them the Lakeview Revue was a huge success.

### **MARCH 15, 1962—AUCTION SALE**

Lakeview raised an amount of money and donated it to the African Students Foundation at an Auction Sale ably organized under the supervision

of Maria Skavinski. Mr. Manns assumed all the duties of a full fledged auctioneer. Barb Valley paid \$2.40 for the slave of the day—Jack Shannon.

### **"GRADE 9 PARTY"—NOVEMBER 3, 1961**

In sharp contrast to the rigorous initiations of previous years, the Grade Twelves went all out to give the Grade Niners a warm welcome to Lakeview High. Throughout the party there were bingo dances, jives, waltzes, spot dances and bunny hops. Games were played and by the end of the evening the Grade Twelve chaperones had the Grade Niners feeling very much at home with their fellow students. The names of the winners of the spot dances were placed in a ballot box to choose a Freshie King and Queen. In a subsequent assembly the names drawn were Jimmy Hill and Darlene Legros. These two winners received Lakeview rings.

### **"PIGSKIN PLATTER PATTY"—FRIDAY, NOV. 10, 1961**

After all the glamour and colourful costumes of the last dance, we came down to earth and had an ordinary sock hop called the "Pigskin Platter Patty." There was a good crowd and everyone danced from eight-thirty until the stroke of midnight to the most recent and popular tunes.

### **"ICE TWIST"—FRIDAY, FEBRUARY 23, 1962**

Even though the skating part of the Ice Twist was cancelled, the dance proved to be a fabulous success. The gym was packed and the dancers indulged in the latest craze the "twist." Edna MacNiven and Dan Koslenik won two records each for their version. The teacher chaperons also seemed to enjoy doing this newest form of exercise.

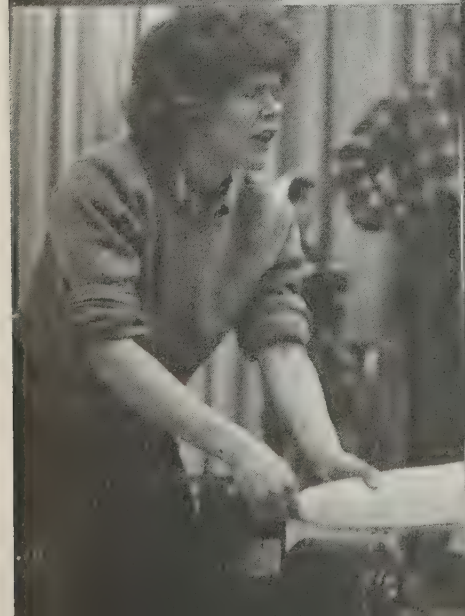

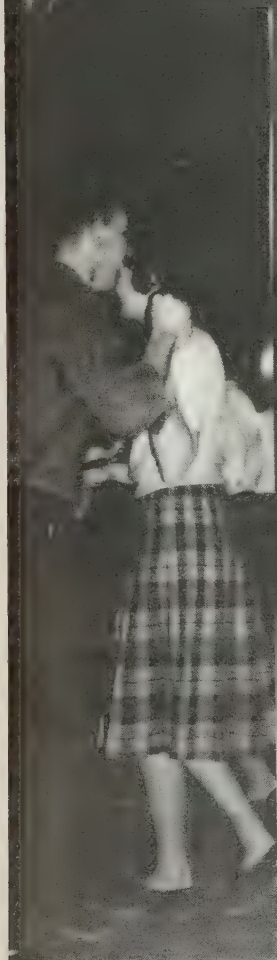

### **"CALYPSO CLIP"—FRIDAY, OCTOBER 13, 1961**

Even though Friday 13th is supposedly unlucky, this superstition proved false as far as Lakeview's first dance of the season was concerned. Everyone donned straw hats, sandals or bermudas — "Calypso Style." Balloons were heaped in the baskets, fish nets and colourful fish decked the walls and stage. Every one seemed reluctant to go home when the last record had been played and it was time to come back to prosaic everyday life.

### **"SKY ROCKET SWING"—FEBRUARY 9, 1962**

The Boys' and Girls' Athletic Association held the "Sky Rocket Swing" and appropriately enough Ronnie Roy and his Astronauts provided the music. Although there wasn't too large a crowd in attendance, thanks to the wonderful band, everyone there had a wonderful time twisting, butterfly-flying, bunny-hopping, jiving and occasionally dancing.
